

Azpiral *PRO* ePOS, Web and App integration checklist

ePOS Integrations

1 **Provision of Mutual Non-Disclosure Agreement** between both parties.

2 **Once NDA is in place**, Azpiral provides a comprehensive technical document to the ePOS partner.

3 **Azpiral creates a test account** and sample offers/promotions for ePOS partners to view.

4 **Client outlines their loyalty functionality requirements** (modules/offer types) to Azpiral.

*Functionality supported by different ePOS software may vary.

5 **Azpiral integration engineer provides support to ePOS partner during their development including;**

- a. Facilitate installation of a beta version of the software to the Azpiral ePOS VM.
- b. Test and validate beta version software solution.

- c. Provide initial test summary to client outlining test case failures (if any) and recommendations.
- d. Re-test updated software iterations until validated.
- e. Create Account (Stores) in a live environment.
- f. Monitor transition from a test environment to live.
